

# FUEL BOOSTER CONTROLLER

# FTC

*Transfers Diesel, Water, Non-Corrosive Chemical from Main Tanks to the Day Tanks*

**Simplex  
Duplex**

0.5 HP – 7.5 HP)  
Single or 3 Phase

## FEATURES:

- Modular circuit board
- Start / stop / over-ride functions
- Visual and audible high and low level alarm
- Operation single or dual pump
- HOA switch
- System test switch
- Motor contactor and circuit protector
- Probe mechanical life better than one million operations
- CSA approved (probe)
- CSA & UL approved (controller)

**Northwest Tech-Con System's** FTC liquid transfer controllers are designed to transfer fuel, water or non-corrosive liquids from main tanks to sub-tanks. The level probe is a single float that actuates a hermetically sealed reed switch in the unit stem to provide the pump controller with stop/start sequences and high or low alarms.
